Assessment/Plan
Daniela P. McCall is a 30yo F with UC s/p TPC in 4/2017 w/ J pouch and diverting ileostomy 5/7/17 s/p closure 9/2017. Old ureteral injury s/p ureteral reimplant with pelvic high, juvenile rheumatoid arthritis on Enbrel presenting with abdominal pain and diarrhea after presenting initially to clinic yesterday with hourly diarrhea and pain. An outpatient CT yesterday was unremarkable so she was sent to the ED for further workup. She has been on prednisone intermittently (self-given) for persistent colitis/pouchitis. Was on Xeloda briefly but had to stop this due to insurance lapse but remains on Enbrel for RA. Flax s/p 11/2017 with pouchitis, pain with chronic active ileitis. Trial of Elavil also not helpful. Prior trials of IFX, ADA with UC not helpful.

Diarrhea, abdominal pain, hx of pouchitis
-HD stable, AF. Flax s/p to be done this afternoon
-Consider treatment with flagyl if significant inflammation encountered
-query Crohn's of the pouch given delays throughout in Nov
- stool studies ordered
-will need to discuss goals of therapy given insurance status
-continue elavil
-morphine 1mg q4h

RA
-continue weekly Enbrel

Exhibit:29 confirmation of the text messaged images from my medical record between Scott Smith and Dr. Clifton Cox. Now Scott Smith says he never treated me (which I and my medical record agree with, my issue with Smith is one of theft of medical records to assist Cox in committing fraud) to get off the hook from being sued under Chapter 74. To the Texas State Medical Board he said he did. Which is it?

Exhibit 33: My bladder function did change, of course UT Southwestern doesn't want to document it and didn't tell me about the ulceration of J-pouch before it had even been reconnected.

Urology Clinics
of North Texas

Patient: Damaris Mccalley
Date of Birth: 01/03/1988
Date: 09/14/2017 2:00 PM
Visit Type: Consult
Referring Provider: Dr. Clifton Cox II
This 29 year old female presents for Office Visit.

History of Present Illness
Office Visit
Returns for recheck and has been hospitalized for weakness and to rule out UTI with blood in stool as well. CT showed an abscess in the pelvic area. Patient had to have an ileostomy and J-pouch as well. The fluid collection was 5 cm and this was aspirated.

Assessment and Plan
WIF - UT Southwestern didn't tell me or write in medical records
Other injury of ureter, subsequent encounter (S37.1XXD).
We reviewed the case again and I feel it is worth attempting robotic ureteral reimplantation. We did discuss that this could equal an open incision if we are unable to obtain insulation after the laposcopy reversal. Risk regarding the anastomosis with leak or stricture and necessity of Foley and stent postop also addressed. Her bladder function will possibly change with mobilization and she understands this as well. She is to schedule a follow up visit surgery.

Medication Reconciliation
Medications reconciled today.

Adherence	Medication Name	Sig Desc	Where	Status
taking as directed	Adderall 30 mg tablet	take 1 tablet by oral route every day before breakfast	Y	Verified
taking as directed	alprazolam 1 mg tablet	take 1 tablet by oral route 3 times every day	Y	Verified
taking as directed	Triptol 300 mg/5 mL (60 mg/mL) oral suspension	take 5 milliliter by oral route 2 times every day	Y	Verified

Medications (added, continued, or stopped this visit)

More information (continued)

Amoxicillin; Clavulanic Acid tablets

What is this medicine?

AMOXICILLIN; CLAVULANIC ACID (a-mox-i-SIL-in; KLAY-yoo-lan-ic-AS-id) is a penicillin antibiotic. It is used to treat certain kinds of bacterial infections. It will not work for colds, flu, or other viral infections.

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.

COMMON BRAND NAME(S): Augmentin

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- bowel disease, like colitis
- kidney disease
- liver disease
- mononucleosis
- an unusual or allergic reaction to amoxicillin, penicillin, cephalosporin, other antibiotics, clavulanic acid, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

Take this medicine by mouth with a full glass of water. Follow the directions on the prescription label. Take at the start of a meal. Do not crush or chew. If the tablet has a score line, you may cut it in half at the score line for easier swallowing. Take your medicine at regular intervals. Do not take your medicine more often than directed. Take all of your medicine as directed even if you think you are better. Do not skip doses or stop your medicine early.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Exhibit 34: After the doctor labels me as pain seeking with no problems once I communicate the issues to the malpractice insurance representative Nichol Bunn I am still given antibiotics on discharge.

Funny, they gave me amoxicillin when nothing was wrong with me negatively? Also hydrocodone when I told doc said nothing wrong with it. They gave it to me, just didn't want to write it in the medical record.

Exhibit 35: Given hydrocodone after they lied on my flex sig and said nothing was wrong with me after I contacted Nichol Bunn /Stan Thiebaud and was labeled as "pain seeking behavior." Clearly something is amiss.
